Subject: FW: CE standard definitions

Sensitivity: Confidential

All,

Here is the currently accepted CE list of definitions for the standard and unique research terms that we use. Pls attempt to incorporate them in any study protocols, ICFs, protocol attachments, study reports,and publications in which you are involved. Let me know of any additional terms you think we should include, or changes that should be made to any future versions. Thanks.

Mingda,

These are the currently accepted CE definitions of standard CE terms that we use. I am looking forward to receiving the final, comprehensive WSA Glossary of Terms for PMUSA clinical and non-clinical research which should greatly aid us in presenting ALL our research results in a uniform fashion. Pls let me know if you have any questions.
